We stand for better health care

Better charting. Better compliance. Better communication.

We're experiencing a time of incredible change in addiction treatment and behavioral health care. New technology, new services and new ideas will be needed to deliver improved outcomes for businesses, for patients, and for payers. AZZLY® is at the forefront of that transformation.

Our team works with health care organizations and consultants to strengthen the health of their business. We do this by delivering a system that helps to control costs, develop productivity, streamline tasks, and improve quality of care.

We focus on bridging the gap between the administrative and the clinical needs of a staff to bring them closer together and to help deliver health care smarter. We empower staff to chart in support of medical necessity and to communicate safely and securely patient progress in support of continuity of care. We deliver features that support compliance with accreditation standards, state statutes and federal mandates to meet performance and outcomes measures.

We empower for profit and non-profit organizations with the technology and support needed to create a gold standard of care and a world of better health.

Our Mission

"Together, we are creating a new generation of health care delivery. Together, we are charting the way to better outcomes."
